

ENVIRONMENTAL POLICY

CSC Civil Constructions is committed to the care of the environment and to the continual improvement of our environmental performance. We recognise the importance of the principles of environmental sustainability and their relevance to the civil construction industry. CSC Civil Constructions aims to conduct its business in a way that protects the environment through efficiently utilising resources and continually improving our control over activities that may lead to pollution or environmental damage.

To protect and improve the state of the environment in which we operate, we will:

- Comply with all relevant environmental legislation and regulations, and other requirements that are placed on us, or to which we voluntarily subscribe;
- Develop, implement and maintain procedures for environmental impact identification, assessment and control, covering all of our activities, and of those who we may influence;
- Establish and pursue environmental objectives and targets that focus on pollution prevention, mitigation of adverse environmental impacts and improved environmental conditions;
- A commitment to environmental sustainability including energy use efficiency, use of renewable or green energy where possible, water use efficiency, waste management, recycling and sustainable procurement.
- Identify competencies required to achieve our environmental policy and objectives and ensure that such competencies are always retained within our workforce;
- Identify potential emergencies and accidents that may impact on the environment and establish procedures for their prevention and response;
- Communicate with our employees and engage with other stakeholders to improve our environmental management performance, and others operating in the civil construction industry;
- Maintain an Integrated Management System that complies to the requirements of AS/NZS ISO 14001:2015
